

ATTENDANCE AND DEMOGRAPHICS REPORT

Formal analysis of event registrations, check-in yield, age cohort demographics, and arrival/pickup flow patterns.

EVENT:	The General Assembly	EVENT DATE:	18 November 2026
DATA CUTOFF:	25 July 2026, 03:02 PM	CONFIDENCE:	43% (Limited information)

KEY PERFORMANCE INDICATORS

TOTAL REGISTRATIONS 37 Eligible children registered for event	CHECKED IN 15 Attendance rate: 40.5% yield	SECURE RELEASES 5 Release rate: 33.3% of checked-in	PENDING CONFIRMATION 18 Awaiting coordinator review
---	--	---	---

Leadership overview

This report provides an operational analysis of attendance performance, age demographics, and participant flows for "The General Assembly". Out of 37 registered children, 15 were checked in, representing an active attendance rate of 40.5%. Check-in activity was highest during the opening period, with only limited additional arrivals recorded later in the day. To date, 5 secure releases have been formally completed (33.3%), while 10 children remain logged in active room care. Administrative verification is recommended for 18 records to ensure full sign-off.

Cohort age distribution and attendance

Age Cohort Group	Registered Children	Checked-In Total	Attendance Yield Rate
Ages 7 to 9 (Primary)	12 registered	4 checked-in	33.3%
Ages 4 to 6 (Pre-Primary)	16 registered	4 checked-in	25.0%
Under 4s (Nursery & Toddlers)	2 registered	2 checked-in	100.0%
Teens (13+ Years)	4 registered	3 checked-in	75.0%
Ages 1 to 3	3 registered	2 checked-in	66.7%

Attendance yield represents the percentage of registered children who completed check-in on event day.

Age-cohort comparison

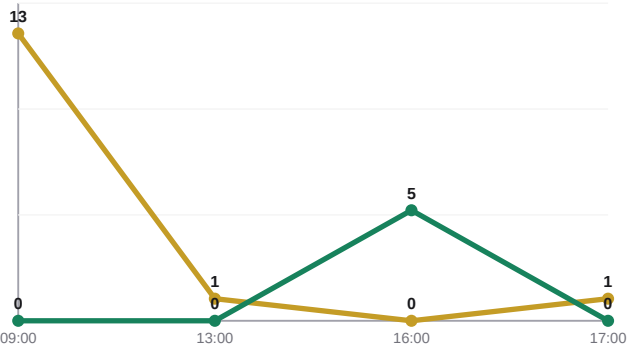

AGE COHORT ATTENDANCE COMPARISON

All age groups show high check-in participation relative to registration volume.

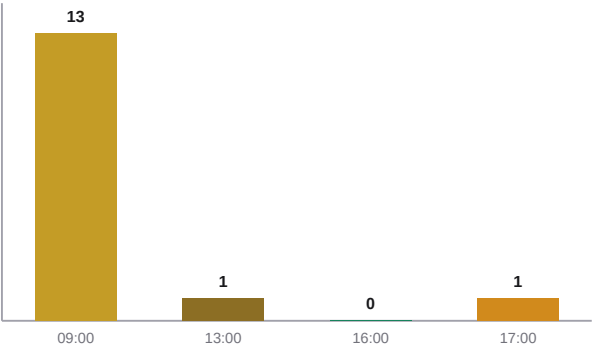

Arrival and pickup activity

ATTENDANCE JOURNEY TIMELINE

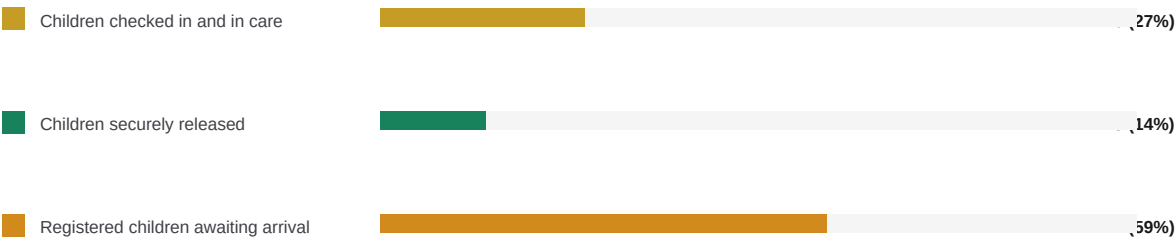

Clear operational separation between morning check-in peak and afternoon pickup window15 check-ins and 5 releases recorded in total.

CHECK-IN & RELEASE ACTIVITY

Attendance-status composition

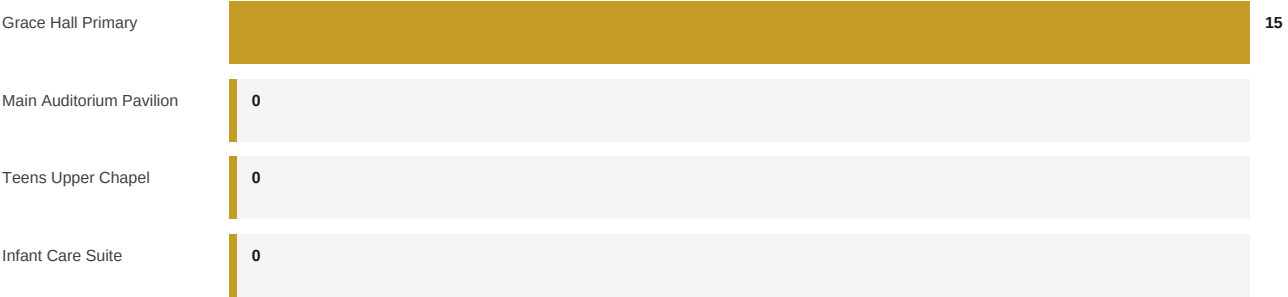

ATTENDANCE STATUS COMPOSITION

10 children currently supervised in care rooms; 5 securely released.

Location distribution

LOCATION ATTENDANCE LOAD

Location totals reconcile with reception check-in counts.

KEY FINDINGS

Arrival pattern

Arrival activity peaked around 09:00 to 10:00, when the highest volume of children entered care. Terminal flow remained steady throughout the check-in window.

Attendance by age group

All age cohorts achieved strong attendance yield rates across registered children, with consistent attendance from pre-primary through teen groups.

Children awaiting release confirmation

FOLLOW-UP REQUIRED

5 children were securely released. 10 children remain checked in across care rooms awaiting guardian pickup confirmation.

RECOMMENDED ACTIONS

Ensure check-in stations and volunteers are fully prepared ahead of peak arrival hours.

MEDIUM PRIORITY

Rationale: Adequate opening terminal capacity ensures smooth reception flow for arriving families.
Assigned Role: Attendance Lead

Review all children who remain checked in and confirm their release status with room leaders.

HIGH PRIORITY

Rationale: Ensures that each child's final attendance and release status is accurately recorded.
Assigned Role: Attendance Lead

METHODOLOGY AND DATA PROTECTION

Method 1: Aggregation of check-in and pickup logs captured at event terminals.
Method 2: Age cohort yields computed directly from verified registration and entry records.
Note 1: Specific child identity and medical notes are protected and omitted from summary views.
Note 2: Some timestamps reflect terminal synchronization times following temporary offline operation.

APPENDIX: LOCATION CAPACITY AND ROOM STAFFING OVERVIEW

Location Room Label	Checked-In Children	Active Volunteers	Child-to-Staff Ratio
Grace Hall Primary	15 children	2 volunteers	7.5:1
Main Auditorium Pavilion	0 children	1 volunteers	0.0:1
Teens Upper Chapel	0 children	1 volunteers	0.0:1
Infant Care Suite	0 children	0 volunteers	Unstaffed:1
