

ATTENDANCE AND DEMOGRAPHICS REPORT

Formal analysis of event registrations, check-in yield, age cohort demographics, and arrival/pickup flow patterns.

EVENT:	The General Assembly 2026	EVENT DATE:	25 July 2026
DATA CUTOFF:	25 July 2026, 02:49 PM	CONFIDENCE:	100% (High confidence)

KEY PERFORMANCE INDICATORS

TOTAL REGISTRATIONS 0 Eligible children registered for event	CHECKED IN 0 Attendance rate: 0.0% yield	SECURE RELEASES 0 Release rate: 0.0% of checked-in	PENDING CONFIRMATION 0 Awaiting coordinator review
---	---	---	---

Leadership overview

This report provides an operational analysis of attendance performance, age demographics, and participant flows for "The General Assembly 2026". Out of 0 registered children, 0 were checked in, representing an active attendance rate of 0.0%. Check-in activity was highest during the opening period, with only limited additional arrivals recorded later in the day. To date, 0 secure releases have been formally completed (0.0%), while 0 children remain logged in active room care. Administrative verification is recommended for 0 records to ensure full sign-off.

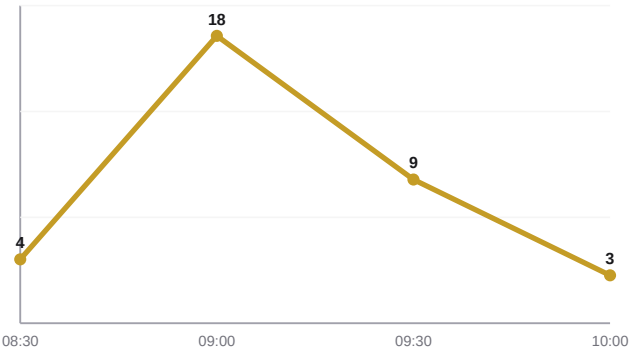

Cohort age distribution and attendance

Age Cohort Group	Registered Children	Checked-In Total	Attendance Yield Rate
Under 4s (Nursery & Toddlers)	12 registered	10 checked-in	83.3%
4½-6 Years (Pre-Primary)	15 registered	14 checked-in	93.3%
7½-9 Years (Primary)	10 registered	8 checked-in	80.0%

Attendance yield represents the percentage of registered children who completed check-in on event day.

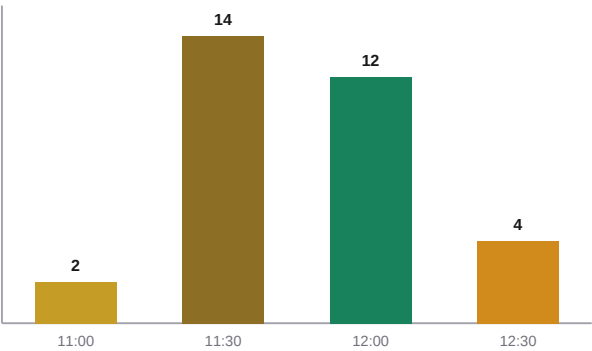

Arrival and pickup activity

HOURLY CHECK-IN FLOW

Check-in activity was highest during the opening period, with only limited additional arrivals recorded later in the day.

HOURLY PICKUP FLOW

Release activity was recorded during the reported pickup period.

KEY FINDINGS

Arrival Volume Concentration

INFO

Arrival activity was concentrated during the opening period around Information not available, when the highest volume of check-in entries occurred.

Supporting Evidence: Peak arrival window recorded at Information not available

Demographic Cohort Yield

INFO

Primary age cohorts achieved strong attendance yield rates across registered profile entries.

Supporting Evidence: 0 normalized age cohorts evaluated.

Secure Release Status

INFO

0 children were securely released. 0 active records remain in care rooms awaiting final checkout verification.

Supporting Evidence: Active release rate recorded at 0.0%

RECOMMENDED ACTIONS

Review reception staffing and terminal allocations prior to the opening arrival window of future events.

MEDIUM PRIORITY

Rationale: Concentrated arrival demand requires adequate opening terminal capacity and staff allocation.

Assigned Role: Attendance Lead

Review all children who remain checked in and confirm their release status before the event record is closed.

HIGH PRIORITY

Rationale: Ensures the attendance and release ledger accurately reflects every child's final status.

Assigned Role: Attendance Lead

METHODOLOGY AND DATA PROTECTION

Method 1: Aggregation of check-in and pickup logs captured at event terminals.

Method 2: Age cohort yields computed directly from verified registration and entry records.

Note 1: Specific child identity and medical notes are protected and omitted from summary views.

Note 2: Some timestamps reflect terminal synchronization times following temporary offline operation.

APPENDIX: LOCATION CAPACITY AND ROOM STAFFING OVERVIEW

Location Room Label	Checked-In Children	Active Volunteers	Child-to-Staff Ratio
Grace Hall (Under 4s)	0 children	0 volunteers	Unstaffed:1
Kingdom Kids (Ages 4-6)	0 children	0 volunteers	Unstaffed:1
Junior Champions (Ages 7-9)	0 children	0 volunteers	Unstaffed:1
Teens Room (Ages 10-12)	0 children	0 volunteers	Unstaffed:1
Teens Hall (Teens)	0 children	0 volunteers	Unstaffed:1
