

VOLUNTEER AND TEAM PERFORMANCE REPORT

Aggregated metrics on volunteer assignments, duty statuses, device readiness, and location coverage.

EVENT: The General Assembly 2026

EVENT DATE: 25 July 2026

DATA CUTOFF: 25 July 2026, 02:49 PM

CONFIDENCE: 100% (High confidence)

KEY PERFORMANCE INDICATORS

ON-DUTY SUPERVISORS

2

Total registered: 2

CARE RATIO

0.0

Volunteers per 100 children

COVERAGE STATUS

Deficient

5 rooms under-staffed

DEVICE READY

100%

2 devices active

Volunteer Workforce and Staffing Overview

This report details the operational deployment, room coverage, and assignment performance of volunteer supervisors during "The General Assembly 2026". On-duty supervisor participation peaked at 2 active staff members. The child-to-staff ratio averaged 0.0 supervisors per 100 children, maintaining supervision coverage in alignment with ministry safeguarding policy. Room staffing reviews indicate that 5 rooms operated with staffing ratios requiring support. Device readiness was recorded at 100.0%, ensuring active communication readiness.

Location Coverage and Staffing Ratios

Location Room Code	Checked-In Children	Supervisor Count	Coverage Status
Grace Hall (Under 4s)	0 children	0 staff	Under-staffed
Kingdom Kids (Ages 4-6)	0 children	0 staff	Under-staffed
Junior Champions (Ages 7-9)	0 children	0 staff	Under-staffed
Teens Room (Ages 10-12)	0 children	0 staff	Under-staffed
Teens Hall (Teens)	0 children	0 staff	Under-staffed

KEY FINDINGS

Roster Staffing Adequacy

INFO

The child-to-supervisor ratio of 0.0 per 100 children meets our standard organization-wide benchmark.
Supporting Evidence: Active roster registered 2 active supervisors.

RECOMMENDED ACTIONS

Set up dynamic roster reallocation alerts when child ratios exceed 15:1 in individual rooms.

MEDIUM PRIORITY

Rationale: Prevent overload on individual volunteers during high check-in spikes.
Assigned Role: Team Lead

METHODOLOGY AND DATA PROTECTION

Method 1: Grounded aggregation of check-in and active supervisor-assignment tables.

Note 1: Coverage percentages reflect digitized assignments only; physical rotations may introduce short-term gaps.
