Location Capacity and Room Density Overview

This report evaluates room capacity utilisation, check-in distribution, and room loading indicators for "The General Assembly". Operations were distributed across 0 active care rooms. Room audits indicate that 0 room(s) experienced temporary capacity spikes approaching maximum capacity. Overall room supervision compliance was maintained, with 100% of rooms fully meeting staffing benchmarks.

Room Occupancy and Ratio Compliance

Location Room Code	Checked-In Count	Nominal Capacity	Room Load (%)
--------------------	------------------	------------------	---------------

GROUNDING OPERATIONAL FINDINGS

Overcapacity Mitigation

INFO

We identified 0 rooms with high occupancy rates, requiring supervisor attention.
Supporting Evidence: Max room load recorded: N/A

PRACTICAL ACTION RECOMMENDATIONS

Impose a check-in block on individual rooms when the physical load reaches 95%.

HIGH PRIORITY

Rationale: Prevent overcrowding and facilitate orderly escape routes in emergency scenarios.
Responsible Lead: Location Supervisor

SYSTEM LIMITATIONS & METHODOLOGY

1. Capacities assume standard child-care spacing guidelines; temporary equipment storage may reduce actual room limits.
